

AGENT vs ^{FULL}HD

Introducing the aGent V5 a full HD webcam. With up to 5MP video resolution, 5 layer German glass lens and Ultra-Light low light sensor

The aGent V5 HD is both Apple Mac and PC compatible

Peace of mind with a 2 year limited hardware warranty.

FULL HD quality VGA sensor

The aGent V5 can capture Full HD quality video at 1920 x 1080 and up to 8-megapixel stillshot images. That's more than quadruple the resolution of our competitors 640 x 480 megapixel cams!

German 5 Layer Glass Lens

No 2 layer cheap plastic lenses here. Our 5 layer supersensor glass lens picks up all the details.

Ultralight Low Light compensation

Designed to shine in low light conditions the aGent V5 outperforms other webcams in low light. Automatically adjusts to provide the best image in low light conditions.

Attach your professional lenses!

With our optional lens adaptor you can attach any normal photographic 37mm lens. The adaptor is compatible with both the aGent webcam range and the discontinued Apple iSight.
